**ZEBRA** CAPTURE YOUR EDGE

# There's an easier way to migrate to Android

## Move at your own pace with All-Touch Terminal Emulation.

**Migrating to Android™ is simpler than you think.** Out of the box, your Zebra devices come ready to ease the transition with All-Touch Terminal Emulation (TE). In just three simple steps, this powerful tool moves your existing TE apps from traditional green screens to a modern, touch-screen user interface. What does that mean for your operations? Reduced training thanks to its graphic, intuitive UI. Bigger, on-screen buttons translate into less risk of errors. And fewer steps mean faster workflows. Plus, there's no development or coding needed—simplifying the entire process.

## Stop Playing Catch-Up With Technology. Migrate Now. **Here's Why...**

**ANDROID SUPPLANTS WINDOWS IN WAREHOUSE**

**87%** of rugged devices in line-of-business applications will operate on the Android OS by 2022*

**OUTDATED TECHNOLOGY JEOPARDIZES OPERATIONS**

Poses Security Risks

Endangers Mission Needs

Increases Costs

**MICROSOFT IS ENDING SUPPORT**

**6.5** in 2020
Windows®
Embedded Handheld

**7.0** in 2021
Windows®
Embedded Compact

## You're three steps away from a better work experience.

### Step 1: Migrate

**Skip retraining workers**

- Present existing telnet apps on Android
- Ease implementation
- Maintain industry standard protocols

### Step 2: Optimize

**Work at full speed**

- Eliminate redundant tasks
- Automate processes
- Create contextual menus based on work
- Train workers in less time

### Step 3: Modernize

**Give your apps a user-friendly look and feel**

- Expedite task and training speeds
- Highlight important on-screen data
- Minimize errors with visual cues
- Mix modernized and native screens

## Make your transition to Android trouble-free.
